SUMMARY

Full-Stack Engineer with 2+ years shipping production-grade SaaS. Independently built and launched ATS FastScan — 140+ users in 2 months, featured on Product Hunt (Feb 2026). Specialized in multi-tenant architecture, LLM integration pipelines, and scalable subscription systems. Delivered 10+ client applications internationally with consistent 95+ Lighthouse scores. Remote-ready with proven async delivery for international clients.

WORK EXPERIENCE

Full-Stack Engineer — ATS FastScan | Self-built SaaS | ProductHunt Feb 2026 | 140+ Users | Feb 2026 – Present

- Sole engineer — owned system design, architecture, security, payments, LLM integration, and deployment end-to-end with zero external engineering support
- Architected a secure multi-tenant SaaS — dual Supabase DBs, Firebase Auth (Google OAuth + Email), server-side JWT (RS256), and Row Level Security; zero cross-tenant data leaks across all tiers
- Built a Gemini-powered LLM resume analysis pipeline (PDF/DOCX) with per-user rate limiting — stable performance under concurrent load for 140+ active users
- Engineered a Razorpay subscription system (Free/Plus/Pro) with feature gating, usage metering, downgrade logic, and secure webhook validation; 140+ users in 2 months post-launch

Full-Stack Developer — Independent | 10+ Clients | SaaS, B2B, E-commerce, Hospitality | Dec 2023 – Feb 2026

- Delivered 10+ production applications using Next.js, React, Node.js, Supabase, and PostgreSQL — full lifecycle ownership from system design and architecture to deployment and CI/CD pipelines
- Built a multi-tenant business dashboard with RBAC (Owner/Staff/Accountant), automated invoicing, billing modules, and OpenAI API integration; enforced data isolation via PostgreSQL Row Level Security
- Optimized frontend performance to 95+ Lighthouse scores and 50%+ faster load times via code splitting and lazy loading; drove +60% online bookings for Hotel Vaibhav and 3x qualified leads for a construction platform
- Delivered AustralMach Engineering's B2B platform (Australia) — remote, async collaboration, on-schedule international delivery using Vite, React, EmailJS, and Cloudflare Turnstile bot protection

PROJECTS

ATS FastScan | React.js, Supabase, FirebaseAuth, GeminiAPI, Razorpay, PostgreSQL

- Self-built multi-tenant SaaS with LLM-powered analysis pipeline and tiered subscription billing — 140+ users acquired within 2 months, featured on Product Hunt

FinDash | React 19, TypeScript, Zustand, Recharts, TailwindCSS, Framer Motion

- SPA with RBAC (Admin/Viewer), sortable/filterable transaction table, dynamic spending insights, CSV/JSON export, dark mode, and async service layer architected for real backend integration

Multi-Business Dashboard | Next.js, Supabase, NextAuth.js, PostgreSQL

- RLS-enforced RBAC system (Owner/Staff/Accountant) with invoice generation, automated billing cycles, and OpenAI-powered AI management assistant

TECHNICAL SKILLS

- Languages:** JavaScript (Expert), TypeScript (Advanced), SQL (Advanced), HTML5 (Expert), CSS3 (Expert)
- Frameworks:** React.js (Expert), Next.js (Expert), Node.js (Advanced), Express.js (Advanced), TailwindCSS (Expert)
- Databases & Auth:** PostgreSQL, Supabase, Firebase, JWT (RS256), Google OAuth, Row Level Security, RBAC
- AI & Integrations:** Gemini API, OpenAI API, LLM Pipelines, Razorpay, REST APIs
- Cloud & DevOps:** AWS (Certified), Docker, Vercel, Netlify, Git, GitHub Actions, CI/CD
- Practices:** Agile, System Design, Performance Optimization, Code Review, Responsive Design, Remote Collaboration, Async Communication, International Client Delivery, Microservices

EDUCATION & CERTIFICATIONS

- Bachelor of Computer Applications (BCA) — GLS University | 2022–2025
Activities: Code Crafters (coding community, workshops) · Google Developer Student Club (GDSC)
- Introduction to Generative AI - Art of the Possible — AWS (2025)
- AWS Cloud Practitioner Essentials — Amazon Web Services (2025)
